

Stack-n-Slash

Step #1 - Use 10" squares. Cut the number of squares required for the project you'll be creating!

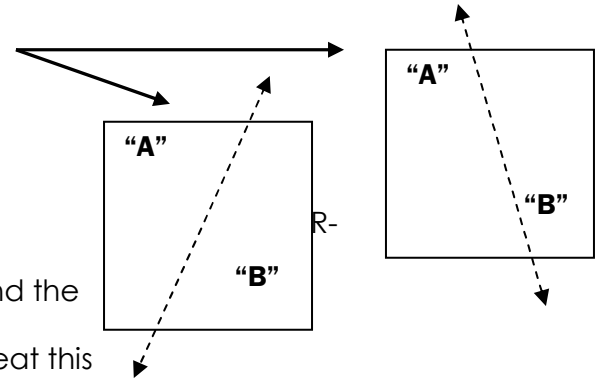

Step #2 - Separate the squares into piles of 4 different fabrics each.

Step #3 - Randomly, make the **FIRST CUT** in a diagonal direction.

Step #4 - Rotate the top piece of Stack "A" to the bottom of its stack.

Stack "B" does not need to be rotated.

Step #5 - Once Stack "A" has been rotated, sew the first "A" and the first "B" together to create a new 2-fabric block. Repeat this 3 times, keeping the stacks of fabric in order.

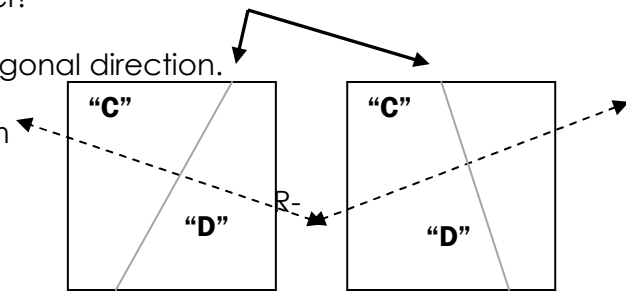

Step #6 - Press the new blocks and stack them in the same order!

Step #7 - Randomly, make the **SECOND CUT** in the opposite diagonal direction.

Step #8 - Rotate the top **TWO** pieces of Stack "C" to the bottom of its stack. Stack "D" does not need to be rotated.

Step #9 - Once Stack "C" has been rotated, sew the first "C"

and the first "D" together to create a new 4-fabric block. Repeat this 3 times, keeping the stacks of fabric in order.

Step #10 - Press the new blocks. Square up to 8½" x 8½".

*NOTE: your blocks may be slightly smaller or slightly larger depending on the direction and the number of cuts you made!!

Step #11 - Lay the blocks out to make your project! Have fun and Make it Special!!!

***You can make more cuts to create a different look with your blocks!!

Just remember, that the more cuts made – the smaller the finished block will become!!
