

## **The Creation of the Healthcare Law**

In the beginning the President looked upon the Healthcare Bill which did not have form and the interpretations were void, and saw it was good.

And the President went before the House of Representatives and the Senate saying, "This powerful new bill will promote employment and reduce the deficit."

And the Congress went before the Joint Committee saying, "It is a vessel of fertilizer, and none may stand before its strength."

And some in Congress went before the people saying, "It's a crock of excrement, and none may abide its odor."

And the people went before the House of Representatives and the Senate saying, "The Healthcare Bill is a crock of crapola and it stinkith."

And the House of Representatives, the Senate, and the President saw it was good and looked upon the Bill saying, "Damn the people, Let it Be Written, Let Be Done."
