PC	50	51	68	69	81	82	88	89	93	94	96	96	98	98	99	

Take point formula:

DP = ME if dropped

TL = ME if take and lose

TW = ME if take and win

$$\text{Take point} = (DP - TL) / (TW - TL)$$

Minimum Doubling point formula:

NL = ME if no double and lose

DL = ME if double and lose

NW = ME if no double and win

DW = ME if double and win

$$\text{Double point} = (NL - DL) / ((NL - DL) + (DW - NW))$$

Turner Formula

$$((24 / T + 3) * D) + 50$$

(Use to derive leader's match equity, T=trailer's points to go, D=difference in scores)

(This doesn't work for the 1-away and 2-away scores, memorize those.)
